Yashwanth M S

Computer Science Student | Aspiring Software Developer
+91 96862 48310 | Hassan, Karnataka | msyashwanth432005@gmail.com | LinkedIn | GitHub

Objective

Aspiring Software Engineer with a strong foundation in Data Structures and Algorithms (DSA) and hands-on experience in Java, C++, C, SQL, and web development. Passionate about building efficient, scalable solutions and eager to learn, contribute, and grow in an innovative real-world environment.

Education

Malnad College of Engineering (Autonomous), VTU — Hassan, Karnataka
B.E. in Computer Science and Engineering; CGPA: 9.09 — *2023 – Present*

APJ Academy (Endowing Gnanadhare PU College), State Board — Hassan, Karnataka
Pre-University (PCMC); Percentage: 91.67% — *2021 – 2023*

Chiranthana English Medium High School, State Board — Hassan, Karnataka
SSLC; Percentage: 89.92% — *2021*

Projects

Energy Optimization for Green Computing using LSTM and DRL (PPO) | *Python, PyTorch, REST API*
- Built a closed-loop data center energy optimization system where a two-layer stacked LSTM forecast (power, CPU temperature, cooling) feeds a PPO-based DRL agent that controls server scaling, CPU frequency, cooling mode, and power source.
- LSTM reached $R^2 \approx 0.87$ (4.18% MAPE for power) and the PPO agent an estimated PUE of 1.338; results are served through a backend API and a web dashboard.

Portable and Compatible Biofilters | *Hardware Prototype, Sustainability*
- Developed an innovative solar-powered air filtration prototype to reduce vehicular PM2.5 emissions using activated carbon and a multi-layer filter design.
- Focused on sustainability, scalability, and ease of deployment for real-world applications.

Department Resource Management System | *Django, SQLite, HTML, CSS, JavaScript*
- Designed and implemented a centralized web application to manage departmental academic resources.
- Enabled role-based access for HOD, faculty, and students, with secure file uploads, approvals, and organized categorization.
- Ensured efficient retrieval of resources using Django's backend with SQLite database integration.

Event Management Portal | *PHP, SQL*
- Developed a web-based event management portal using PHP and SQL to handle event creation, registrations, and participant management.
- Implemented secure authentication and efficient database operations.

Technical Skills

Core: Data Structures & Algorithms, Real-World Problem Solving
Languages: C, C++, Java, SQL
Web Development: HTML, CSS, JavaScript, Node.js, Spring Boot
Databases: MySQL, PostgreSQL, MongoDB
Design: Figma (UI/UX), Canva

Languages

English, Kannada (Native)

Certifications

Python Certification | Web Development Certification | Figma Certification

Competitions & Achievements

- Runner-up at **Aeronox**, an innovation and technology competition at Anurag University, Hyderabad. View Certificate
- Top 20 Projects at the **IUCEE Annual Student Forum (IASF) 2025**, VNR VJIET, Hyderabad. View Certificate
- Participated in a Hackathon at the **IUCEE Annual Student Forum (IASF) 2026**, January 2026. View Certificate
- Participated in a Hackathon organized by Team Vertex at Navkis College of Engineering. View Certificate
- Participated in a Hackathon at **Tech Triad 2025**, organized by the Dept. of ISE at Dayananda Sagar Academy of Technology and Management. View Certificate

Extra-Curricular Activities

- **Head of Digital and Social Media**, IUCEE: strengthened the organization's online presence and expanded outreach.
- **Event Manager**: managing and organizing events to enhance student engagement and participation.
- **Volunteer Member**, CalmStacks 24-hour hackathon conducted by the Dept. of CSE, Malnad College of Engineering.
- Taught frontend web development (HTML, CSS, JavaScript) through IUCEE's workshop series.
